

Instructions for Compilation of PD_PAL Application:

1. Open XCode Application
2. In the task bar, select *File > Open* and select the PD_PAL.xcworkspace application folder located in the root of the .zip file

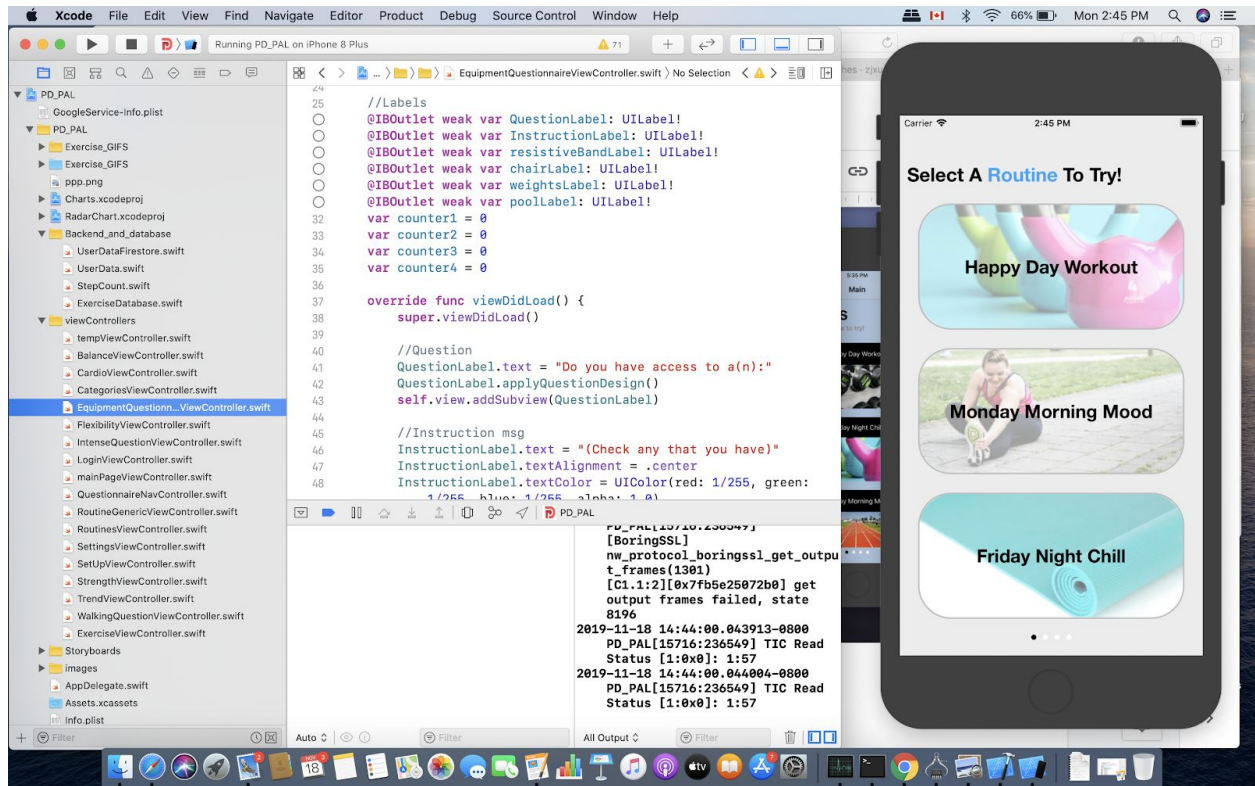

*****Note: This is very important!! You must open the “PD_PAL.xcworkspace” application folder and not the “PD_PAL.xcodeproj” application folder!*****

3. Make sure that the target scheme is PD_PAL and the target simulator is “iPhone 8 running iOS 12.1”

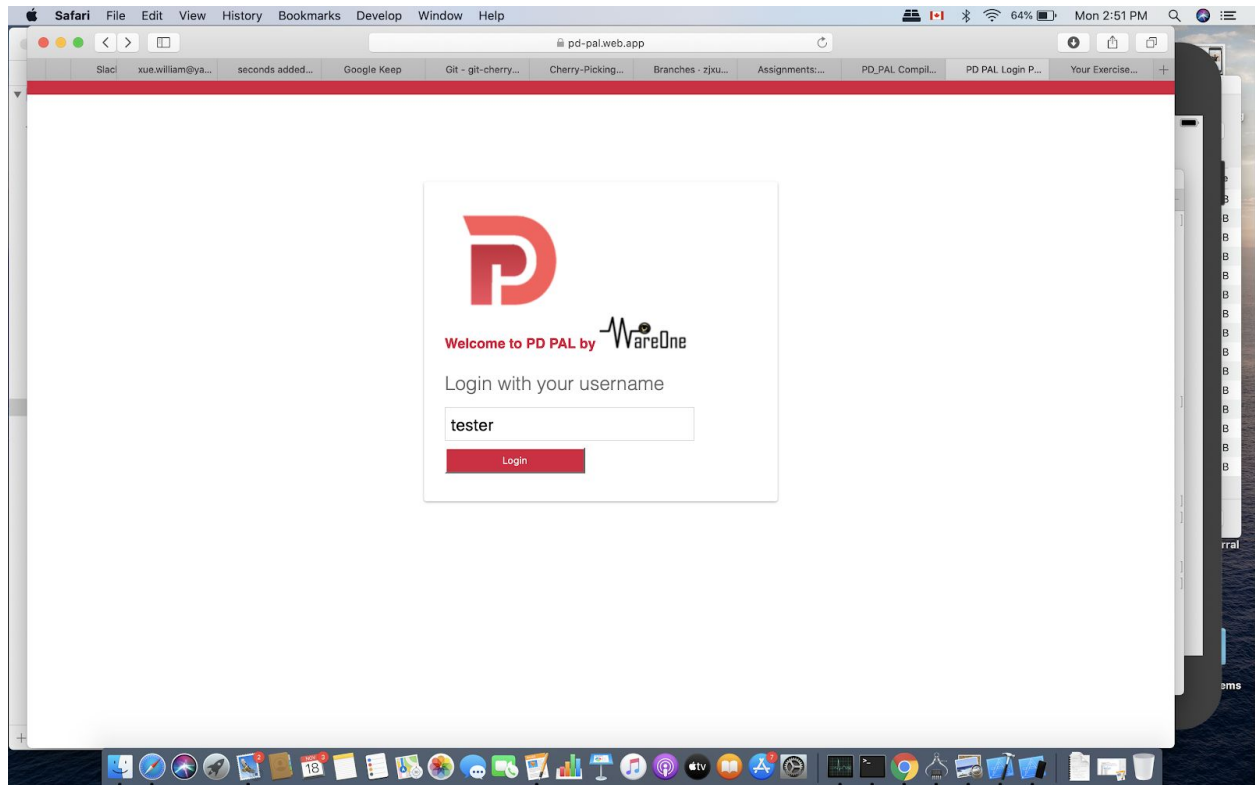

4. You can now build and run the current scheme with the play button.

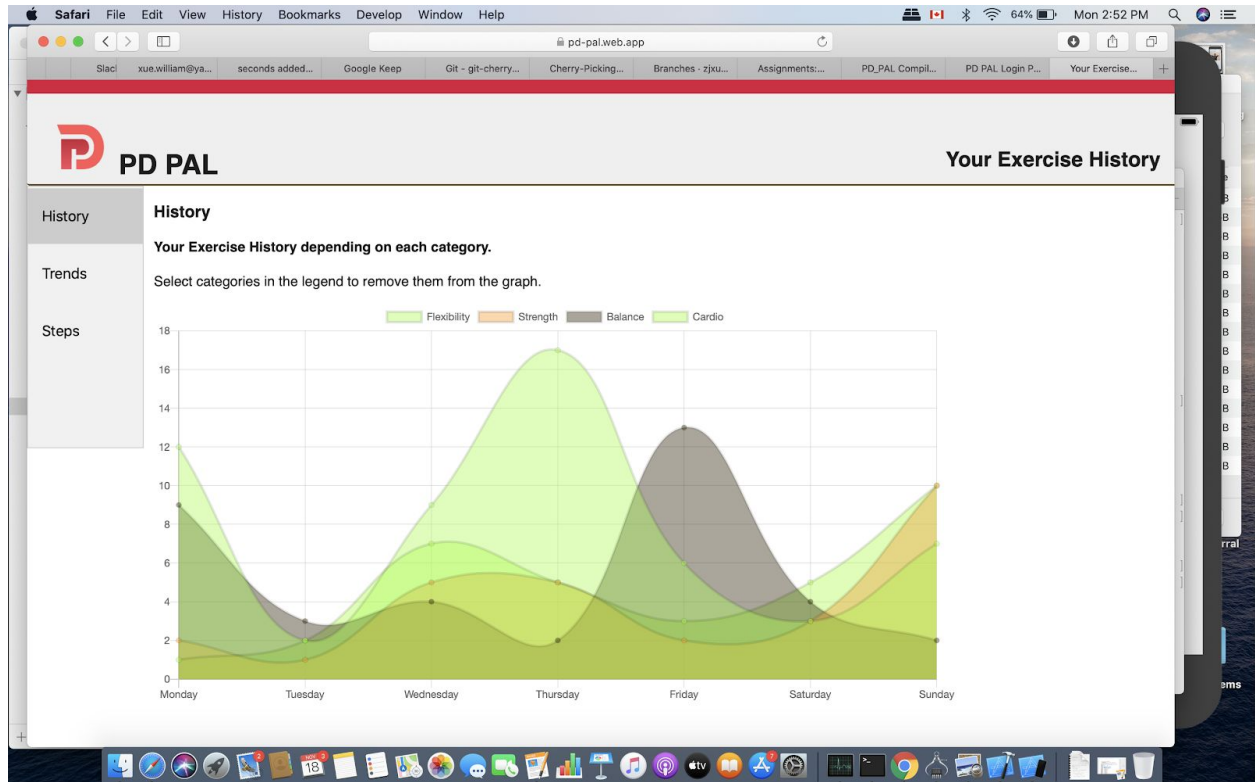

Instructions for Accessing PD_PAL Website:

1. Open your web browser and navigate to the URL: <https://pd-pal.web.app>
2. When prompted for Login, enter: “tester” without the quotation marks

3. You will now be able to access the website.

****Note:** Although the graphs are shown, the data does not yet correspond to data logged in the application. The website simply shows dummy data. Backend connections will be implemented in iteration 3**
